

**Town of Killingworth  
Inland Wetlands and Watercourses Commission  
Killingworth, Connecticut 06419**

Continuation of Regular Meeting  
#11-09

September 20, 2011

Chairman Rockwell called the meeting to order at 06:12 p.m. at 90 Route 148.

**Members present:** J. D'Angelo, E. Auer, G. Rockwell

**Members absent:** T. Doyle

**Visitors:** Mr. Teague Moyer, agent for the landowners

The Commission members inspected the site and noted that the wetland boundaries agreed with the plan presented. Mr. Moyer said that the existing septic tank and leach field system would be removed and that he would submit a plan showing the construction characteristics of the proposed asphalt-surfaced tennis court.

The site is largely exposed ledge rock (as is much of the land in this parcel) and blasting will be required. Mr. Moyer proposes to excavate to a depth of approximately two feet in order to be able to install an adequate gravel base. The surface of the proposed tennis court will slant slightly toward the wetlands and appropriate plantings will be installed along the boundary to prevent erosion and sedimentation.

No motions were made, no votes were taken, and no communications were received.

The meeting was adjourned at 6:38 p. m.

Respectfully submitted,

Gaylord Rockwell  
Chairman
